

BuzziBlinds Classic

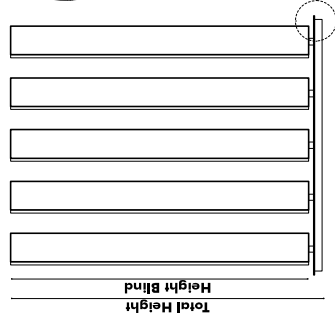

— By Alain Gilles

Rotating acoustical blinds

These rotating acoustical blinds take their inspirations from modernist architecture and more specifically from the exterior sunshades that can be found for instance on modernist buildings designed by Oscar Niemeyer in Brasilia. And also by the rhythm and tonalities created by the orientation of these BuzzBlinds. The concept has been turned into elements that can define and partition open-space offices.

BuzziBlinds

— By Alain Gilles

Acoustical performance and privacy with a twist

After the introduction in 2011 BuzziBlinds Classic became an instant hit as partitions for open-plan spaces. Five year later it's time to add some zest to the family. BuzziBlinds are inspired on modernist architecture. The rhythm and tonalities created by the orientation of the v-cut BuzziBlinds add a dynamic of depth to any space.

The free-standing room divider is made up of a series of five rotating acoustic blinds. With a simple twist, the blinds can be opened or closed to varying degrees to create privacy or open-up a space. This gives individuals the opportunity to determine the level of privacy they may want or need at any given moment to concentrate on a specific task.

BuzziBlinds offering consist of 4 different shapes of the fins covered with plane BuzzFelt. Adding a V cut feature to the covered fins enhances a stronger architectural look in your space.
