## BuzziClipse

— by BuzzSpace Studio

---

### Acoustic play of light

BuzziClipse offers the best of both worlds; subtle back lighting experience and highly acoustical performance. The front panel of BuzziClipse, designed to tackle acoustical issues in a room, is based on a highly finished aluminum frame housing the LED line with an output of 870 lumen. The LED frame is offered in 2 variants: square and rectangular. Playing with different LED frames combined with front panels, upholstered in different fabrics, results in a nice wall feature. A true acoustical "eclipse".
