

# FLOOR OFFICE

# PERFECT DAY LIGHT

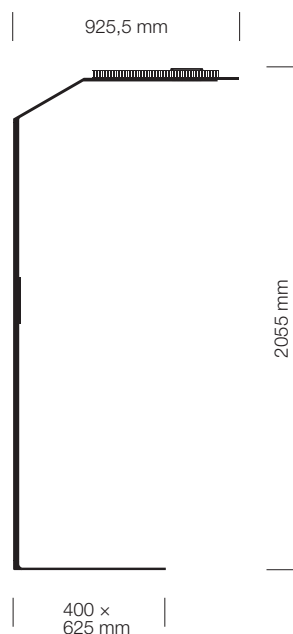

The way light is used is evolving rapidly. Traditionally, space has been lit to help people perform tasks or create a certain mood but now the third dimension of light effects is coming to the fore; the targeted support artificial light can have on the biological rhythm. The right light at the right time enhances well-being and performance.

LUCTRA® integrates these findings into everyday life using modern LED workplace lamps: individually adjustable, easy to use and timeless in appearance. LUCTRA® allows the user to retain control over optimal personal light quality – manually via the intuitive VITACORE® electronic panel, or using the app-controlled personal light profile.

The high-quality finish of the German-manufactured range confirms the LUCTRA® promise: perfect light for a perfect day.

# FLOOR OFFICE

The floor lamp complies with the lighting requirements of DIN EN 12464-1 and the workplace ordinance ASR 3.4.

FLOOR OFFICE is the innovative floor lamp for offices with one or two workplaces and modern open space offices. The biologically effective floor lamp features direct and indirect lighting, it optimally illuminates both the work station area and the surrounding area, and guarantees the best efficiency. The indirect light distribution via a specially developed plastic surface follows the new possibilities of LED technology and reinterprets the image of floor lamps. The Light Guiding Panel is not only artistically unique, it also ensures a large-area illumination with highly even light distribution.

Control	via VITACORE® electronics or app
Sensors	variable presence and light intensity sensor
Setting of light intensity	continuously up to 1,000 lux
Setting of light colour	in three steps 2.700/3.600/6.500 kelvin, continuously via app
Luminous flux of luminaire	10,000 lm
Clearance	2 m
Lamp base	C-shaped
Product number	9240
Colour	23 aluminium

# FLOOR OFFICE FEATURES

01 |

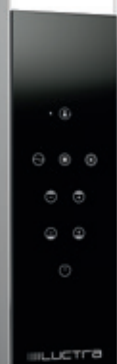

**01 |** Direct and indirect light separated and continuously dimmable from 0–100%, high light intensity of 1,000 lux at a height of 125 cm above the work surface, use of high-quality brand LEDs, long LED service life of much more than 50,000 hours

**02 |** VITACORE® electronics for separate control of direct and indirect lighting, parallel direct and indirect setting of colour temperature from 2,700 to 6,500 kelvin, adjustment of colour temperature to personal daily rhythm with VITACORE® app, sensor technology for presence and light intensity

**03 |** C-shaped base for optimal positioning at all desks
