

Three Trunk | Josef Biersch & Mander Liefing

A solitary stump.

Taste the air of freedom and just sit down. The Tree Trunk collection consists of small, metal works of art. Their curved lines come from ground sheets of metal. Once bent into the right shape, you have Tree Trunk. Beautiful as a side table, object and stool.

Place a couple of Tree Trunks next to each other and create variations in height and colour. Create a miniature landscape as a meeting place for persuasive arguments, smart solutions and innovative ideas. Or place a solitary stump as a decorative object and a handy side table.
